Your donation goes direct to families! WE DON’T RESELL.

Our donation quality standards are high because our families need them to be.

As our warehouse does not have the available space to repair or deep clean donated items, we regularly pass donated household and furniture items direct to families in need.

While we do have to follow various guidelines, we set the standard for acceptable donations. We feel it is important that our client families have high quality choices to place in their home as many won’t have that opportunity or choice outside of Sharing Connections.
